DETAILED ACTION

Claims 1-3 and 5-7 have been canceled. Claims 37-46 have been added. Therefore, claims 4, and 8-46 are currently pending in this Application. Claims 12-27 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

Response to Restriction

Applicants' election, the invention of Group I, claims 1-11 and 28-36, drawn to 1.

compounds represented by formula (I),

and specific compound

4-[4-methoxy-3-tetrahydrofuranyloxyphenyl]-1-[N-(5-(4-methoxyphenyl)-1,3,4-thiadiozole-2-1]yl)aminocarbonyl-methyl]-2-pyrrolidone

in response filed on March 12, 2007 is

acknowledged. Applicants argued that the search been extended until a prior art is found. The examiner extended the search as shown below.

The scope of the elected subject matter and the search has been extended as follows:

Compounds of formula,

,depicted in claim 1, wherein: R1

and R2 are as defined; R3 represents CH₂CONHR5; and R5 is as defined. As a result of the election and the corresponding scope of the invention identified supra, the remaining subject matter of claims 1-11 and 28-36 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. Therefore the subject matter which are withdrawn from consideration as being non-elected subject differ materially in structure and composition and have been restricted properly a reference which anticipated but the elected subject matter would not even render obvious the withdrawn subject matter and the fields of search are not co-extensive.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Art Unit: 1626

Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 4, 8, 30-36, are provisionally rejected under the judicially created doctrine of obviousness-type double patenting over claim 4 of co-pending U.S. Application No. 11/253,812. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to the same art recognized subject matter. A reference anticipating one set of claim will render the other obvious and it would have been obvious to one of ordinary skill in the art at the time of the invention was made. Both Applications are directed

to compounds of Formula

and there is huge overlap on the definition of the

10/825,610 Art Unit: 1626

variables R1, R2, R3, R4, R5, R6 and R7. For example `812 Application teach

in claim 4, where in:

R¹ is ethyl, isopropyl, cyclopropylmethyl, or cyclobutylmethyl;

R² is -CHF₂;

R³ is -CHR⁷CONHR⁵, wherein R⁵ is a phenyl substituted one or more times by -F, and R⁷ is -H.

The instantly claimed invention teach compounds of the same Formula wherein R1 is alkyl, cycloalkyl, aryl; R2 is alkyl optionally substituted by halogens; R3 is CH2CONR5R6; R5 is aryl; R6 is H; of the compound defined in both Applications. The claimed utility of both compounds are the same which would lead one of ordinary skill in the art, to be motivated to prepare additional compounds. Therefore, the instantly claimed compounds would have been suggested to one skilled in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not been yet patented.

Claim Objections

Claims 9-11, 28, 29 and 46, are objected to for depending on a canceled claim.

Claims 37-45 are objected to for containing non elected subject matter.
